LeetCode GeeksforGeeks

Education

Vellore Institute of Technology **Sep 2023 – Jun 2027**
*B.Tech in Electronics and Communication Engineering (AI and Cybernetics) - CGPA: **9.41** (Full-Time)* *Bhopal, Madhya Pradesh*

Govt. Excellence (CM Rise) Higher Secondary School **May 2023**
*Senior Secondary School Certificate, Class XII – **94%*** *Hatta, Damoh, MP*

Govt. Excellence (CM Rise) Higher Secondary School **July 2021**
*High School Certificate, Class X – **94.8%*** *Hatta, Damoh, MP*

Technical Skills

- **Languages**: C++, Python, SQL, DSA in C++, OOPS
- **Tools & Platforms**: GitHub, VS Code, Arduino, LTspice
- **Core Skills**: Embedded Systems, Hardware Testing, System Integration, Debugging, Sensor Interfacing, Data Analysis, Problem Solving, Technical Documentation
- **Relevant Areas**: Electronics, Industrial Automation, Robotics, IoT, Computer Vision, Manufacturing Systems

Projects

Women's Safety Device [https://l1nq.com/safetydevice] **May 2025 – July 2025**
– Developed an IoT-based women's safety system using Arduino/ESP32, GSM, and GPS for real-time emergency communication and location tracking.
– Integrated GSM–GPS modules through UART communication and implemented embedded firmware for alert generation and wireless data transmission.
– Performed sensor interfacing, power management, hardware debugging, and system testing to improve communication reliability and overall system performance.

Smart Patrol Bot [https://l1nq.com/smartpatrolbot] **Jan 2025 – Apr 2025**
– Built an ESP32-CAM-based indoor security patrol robot integrating PIR sensing, wireless communication, and live video streaming for remote monitoring.
– Implemented motion detection, image capture, and real-time video streaming while integrating Bluetooth control and Telegram Bot API for remote alerts.
– Handled embedded hardware integration, sensor interfacing, camera configuration, debugging, and system validation for reliable patrol operation.

Automatic Aerator System (AquaDox) [https://sl1nk.com/aquadox] **Sep 2024 – Dec 2024**
– Engineered an IoT-enabled aquaculture monitoring system for real-time measurement and management of dissolved oxygen, pH, and water temperature.
– Integrated multi-parameter sensors with a microcontroller for continuous data acquisition and developed automated aeration logic based on monitored water conditions.
– Conducted data collection, system testing, and performance analysis to evaluate sensor operation and improve the efficiency and reliability of the aeration system.

Achievements

- Awarded Dream STARS Scholarship from VIT Bhopal University.
- Secured 1st position in district merit (Class XII); awarded State Merit Scholarship and Scooty.
- Recipient of the INSPIRE Scholarship from the Government of Madhya Pradesh.

Certifications

- Embedded System Design Internship (Maven Silicon) [https://l1nk.dev/mavensilicon]
- Applied Machine Learning in Python (Coursera) [https://acesse.one/machinelearning]
- Introduction to Internet of Things (NPTEL) [https://acesse.one/internetofthings]

Extracurricular Activities

- Member, Electric Vehicle Club and Music Club
- Actively participated in cultural events during VIT Bhopal's ADVITYA Fest

Additional Information

- **Languages:** English, Hindi
- **Hobbies:** Singing, Crafts, Dancing
